SEQUEL IS..

Sequel is a high value supply chain management company that provides comprehensive solutions for critical logistics requirements, globally. Over the years, they have developed specialised capabilities, skill sets and domain knowledge, required to manage and enhance 'critical' global supply chains.

Their highly trained staff, secure global network and robust IT systems are aligned to offer customers a superior and personalised logistics experience.

SEQUEL NEEDED...

- Real time information
- Low staff/High Shipment ratio
- Fast, Scalable and long term

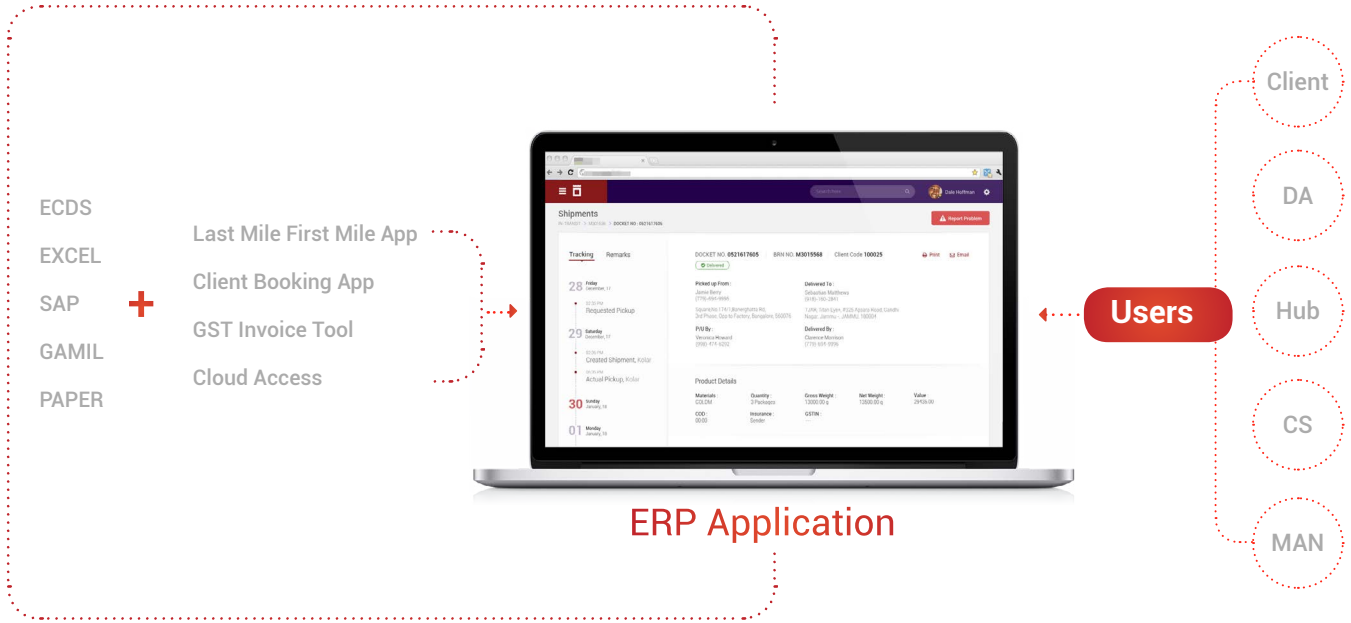

KEY CHALLENGES...

- Sequels customers did not have adequate control over shipment process
- Billing process were manual and took a substantial work force to calculate the invoice amount at end of every billing cycle.
- The internal tool that the company used to manage shipments was very tedious, it caused them to create a team just to update the shipment related data, this team's entire job was to perform data entry for all the shipments
- Inadequate tools for last mile and first mile delivery.

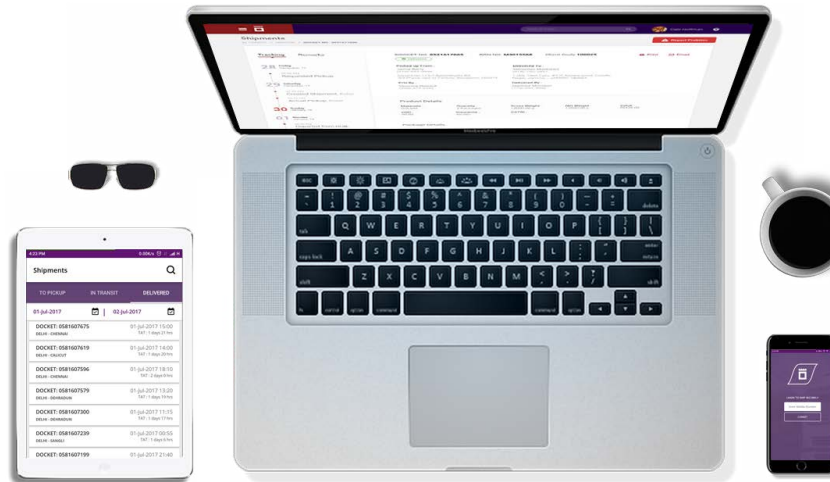

OUR SOLUTION...

WE CREATED...

- Web Application / Mobile Application / Tablet
- Alerts, Requests, Support & Queries
- Identity Verification
- Custom Reports
- GST Invoice Generation
- Sales & Marketing Tool
- Last Mile & First Mile Delivery App

OUTCOME

- Our software processes 70,000 shipments per month efficiently from over 2500+ Customers.
- Over 1000+ GST invoices were created just in 3 working days by the billing team facilitated by our software.

Thank You
